Montreal, Quebec · linkedin.com/in/gregoire-duminil-230

French (native) · English (fluent) · Investment Professional CFA candidate · Front / Middle / Back office · Risk model builder through AI (Grok CLI)

SUMMARY

As Credit Risk Analyst covering Hedge Funds at BNP Paribas, I lead manager due diligence, write risk memos, and recommend credit limits to risk committees. That institutional edge sits on a **full front-to-back path** across two major banks: BNP Paribas and Natixis Asset Management, and ProRealTime trading platform. I sharpen market judgment by running a multi-asset personal portfolio under live conditions, and I have delivered ESG research for the **French Ministry of Finance** via Roche-Brune Asset Management. I also **build AI-assisted risk** analytics and portfolio-review tools in Python with Grok / xAI Build—bridging credit risk, markets, and modern tech.

CORE COMPETENCIES

Investment partner / hedge fund due diligence · Credit and operational risk profiling · Risk memos and committees · Exposure, KPI, and recommendation follow-up · Risk controls and frameworks · Multi-asset products and stock loan · AI for analysis and process optimization · Python · Power BI (intermediate) · Advanced Excel / Microsoft Office · Bloomberg · Data quality / CRM · ISDA/CSA · GMRA/MRA · PBA

PROFESSIONAL EXPERIENCE

Credit Risk Analyst – Hedge Funds | Front office
May 2024 – Present

BNP Paribas · Permanent · 4 years total at BNPP — Montreal, Quebec

- Perform **client facing** due diligence and credit analysis on hedge funds : strategy, leverage, liquidity, exposures, and financial soundness analysis leading to a structured recommendation of credit limits.
- Presentation of risk reviews to Credit Risk Committees; issue concrete recommendations to mitigate risk and support decision-making.
- Monitor exposures daily and follow risk issues (ad hoc analysis, stress situations); administer counterparty credit ratings, and multi-asset initial margins.
- Negotiate contracts with hedge fund counterparties : ISDA/CSA, GMRA/MRA, PBA.
- Coordinate with internal and external stakeholders to protect the bank's interests and maintain independent risk assessment.
- **Improvement** of disclosure collection and accuracy from counterparties **by a factor of 20x**.

Profit and Loss Controller | Middle office / Controls
August 2022 – May 2024

BNP Paribas · Permanent · 1 year 10 months — Montreal, Quebec

- Provide independent daily P&L control (Greeks) across futures, options, equities, swaps, interest-rate derivatives, and structured products, identify gaps and pricing risk.
- Ensure pricing configurations align with strategy and internal controls; partner with V&RC and Risk; resolve operational gaps with front office and trade support; train juniors along the way.

Client Services | Middle office
February 2020 – October 2020

ProRealTime Trading · Permanent · 9 months · Broker / Trading platform — Rueil-Malmaison, France

- Streamline middle-office and client-service processes (**up to 3× efficiency**) and introduce quality controls to strengthen operational reliability of the platform.

ESG Data Analyst | Research contract
December 2019 – January 2020

Roche-Brune Asset Management · Mandate for the French Ministry of Finance — Paris, France

- Deliver original research, through Roche-Brune AM, for the **French Ministry of Finance** on the impact of Sustainalytics ESG ratings on listed-company valuation : extraction, analysis, and decision-ready research.
- Apply GRI, SASB, TCFD, and CDP. Publication contribution: "La méthodologie Apicil Asset Management – Trophée Grande Entreprise" (Trophées de l'Immatériel 2020).

Financial Journalist | Internship
October 2018 – January 2019

N3D – New Deal Due Diligence · 4 months — Paris, France

- Write financial articles for wealth management advisors, clear synthesis for decision-makers.

Back Office Operator – Stock Loan Borrowing | Back office
June 2015 – December 2015

Natixis Asset Management · Internship · 7 months — Paris, France

- Support CRM data quality and compliance during the reorganization of Natixis' stock loan department.
- Perform vetting, settlements, clearances, and record-keeping for stock loan transactions, operational discipline supporting risk control.

PARALLEL EXPERIENCE — PORTFOLIO MANAGEMENT (PERSONAL ACCOUNT)

Portfolio Manager (personal account — employer-compliant)
August 2012 – Present

Self-employed · 14 years of live markets

- Manage a multi-asset portfolio (equities, ETFs, options, futures): allocation, hedging, and risk discipline across market cycles.
- Build Python tools for point-in-time backtesting, stress testing, and weight optimization (proprietary risk-return models for personal use, through test and trials by the help of Grok's CLI interface backed by personal understanding, judgment and experience).

PORTFOLIO - SELECTED AI-ASSISTED RISK ANALYTICS PROJECTS

Personal platforms built in Python (through Interactive Brokers data) with support of generative AI tools (Grok / xAI Build) to accelerate modelling, portfolio review, and controls :

- "All-Weather" Risk Platform : portfolio constructuion of multi-assets, point-in-time backtesting, stress tests, portfolio metrics, automated reports.
- Dynamic option pricer : generation of portfolio greeks, simulated or real analysis of portfolio greeks, stress testing through hypothetical and historical scenarios, visual representation of the outcomes.

- Financials Analyzer: screening of company’s earnings, comparaison to peers (North American and europeen market), detection of hedging possibilities, e.i. kerosene hedge for airline company.
